<p><b>ZERO EMISSION</b></p>	No Emissions	The biggest advantage of an electric vehicle is its green credential. Electric cars are 100 percent eco-friendly as they run on electrically powered engines. It does not emit toxic gases or smoke in the environment. An electric car buyer greatly contributes to a healthy & green climate.
	Reduced Noise Pollution	Electric cars put a curb on noise pollution as they are much quieter. Electric motors are capable of providing smooth drive with higher acceleration over longer distances.
<p><b>NO GAS</b></p>	No Gas Required	These cars can be fuelled for very low prices, Electric cars are also economical & provide reduced running cost / km.
<p><b>LOW MAINTENANCE</b></p>	Low Maintenance & Low Cost	Electric cars run on electrically powered engines, and hence there is no need to lubricate the engines, anything related to the combustion engine or a ton of maintenance tasks that are usually associated with a gas engine. Therefore, the maintenance cost of these cars has come down.
<p><b>EASY TO DRIVE</b></p>	Easy Driving	You can operate an electric car with just the accelerator pedal, brake pedal and steering wheel. Another really useful feature is regenerative braking. In normal cars, the braking process is a total wastage of kinetic energy that gets released as frictional heat. However, in an electric vehicle, the same energy is used to charge the batteries.

<b>Delivery</b>	Delivery of the vehicle will happen in 4 working days post receipt of full payment subject to availability of vehicle in stock.
