It will growl; it will purr.

It will scream; it will whisper.

It will pull the rug out from under your feet.

And then seat you on a velvety cushion.

Fusion
series

PRO FX's Fusion Series of speakers employ the most advanced speaker technology: **our proprietary APTEM technology**. It combines innovative Acoustic Parametric Design with **LMS/LEAP software that optimizes speaker cabinet design** along the Thiele-Small parameters and Equal Loudness Contour Curves.

Every part of a PRO FX speaker is crafted from the finest materials available. Our cabinets are made out of **high quality wood to minimize box resonance**. We use gold-plated terminals and binding posts to eliminate any possibility of signal loss. **High temperature voice coils**

and bullet phase drive units deliver exceptional depth and clarity of sound. These reduce the inherent phase cancellations that occur between the dust cap and the speaker cone.

Finally, highly trained acoustic engineers put every PRO FX speaker through a series of quality tests using a battery of sophisticated equipment. Every slight and subtle imperfection is picked out and resolved completely.

Only then is the speaker deemed worthy of being offered to you.

Fusion 5F - Tower Speaker

The floor standing model of the PRO FX range, the Fusion 5F is a masterpiece of engineering design and style. With maximum power of 150W, it has a 3-way design comprising two 7" bullet phase woofers and a 1" dome tweeter. The woofers employ a Pulux surround to anchor the diaphragms, significantly improving transient characteristics.

Fusion 5C - Centre Speaker

The Fusion 5C features two 5" shielded bullet phase woofers and a 1" dome tweeter that delivers extra-rich, timbre-matched voice frequencies.

Fusion 5 SW - Powered Subwoofer

This powered subwoofer produces 200W of earth shattering bass, making it perfect for your home theatre and for stereo listening. It has a 10" front firing woofer, adjustable volume and crossover frequency.

Bullet phase drive units for distinctly clear & dynamic sound.

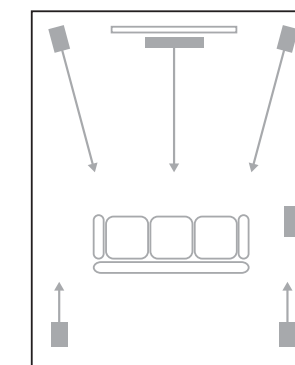

Gold plated binding posts with bi-wiring (5F).

Bi-Polar Surround Speaker - Top View

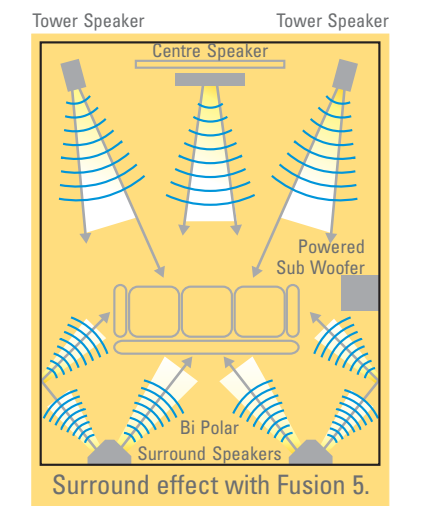

Fusion 5S - Bi-Polar Surround Speaker

The bipolar surround Fusion 5S envelopes you with natural, spatial surround effects. The 5" bullet phase woofer along with the two dome tweeters transports you to the midst of the action.

Surround effect with conventional speakers.

Surround effect with Fusion 5.
