Overall Rating					
Final Word	Best video quality for under \$60, much better than the DVR-207.	The best discreet camera for \$85. Great video quality, size and support.	A GoPro clone for a much more reasonable price. Great as an action cam but as a dash cam, the Mobius has similar features for a better price. Reliability and build quality is average but a reasonable solution if you are looking for a versatile camera.	Good specs but early reliability and quality problems are disappointing given the high price point.	For the money this is a good buy if you want WiFi. If WiFi is not important, consider a smaller, more discreet camera.
