Cavity Waxes

Cavity Wax is a corrosion preventative that forms excellent films in cavities. The product is solvent borne and based on mainly synthetic waxes and corrosion inhibitors. When the solvent has evaporated, the product leaves a beige, waxy, water repelling protective film that offers a very good corrosion prevention.

Products in the Cavity Wax are designed for application in closed cavities & open surfaces

Rust preventive Fluid

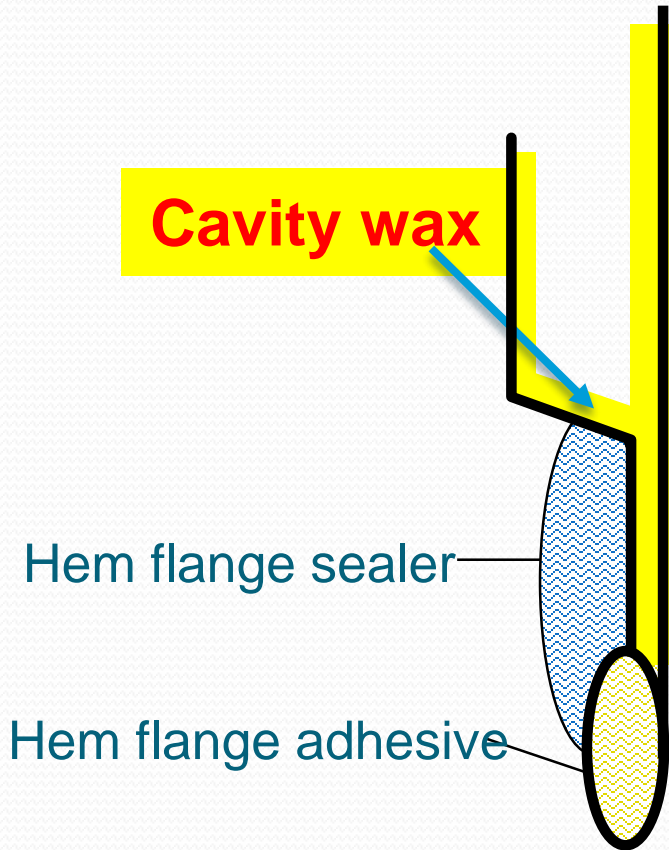

These also form a part of the cavity wax family.

This Product is a rust preventive fluid with excellent film building properties on open surfaces as well as in cavities.

The product is mainly based on synthetic waxes, oil, corrosion inhibitors and solvent of white spirit type.

Range of use -This is designed for protection of sheet metal , spare parts , air compressors , motors, pumps etc.

Why are Cavity Waxes necessary ?

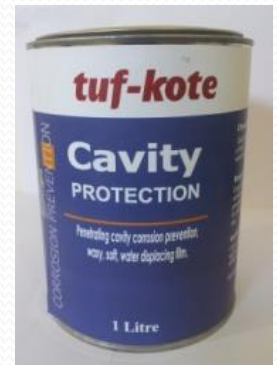

Zn-layers can be damaged around

- cuts
- spot welds
- folds
- edges

EC-coat does not reach all

- folds
- joints
- gaps

⇐ High penetrating corrosion protection waxes prevent corrosion in these areas.

Under Body Coating

Under Body Coating is a thixotropic corrosion preventive which provides long-term resistance against corrosion and abrasion even under difficult conditions. When the solvents have evaporated, a tough, elastic, waxy protective film remains on the sheet metal, giving a high degree of protection.

Uses :

Under Body Coating is an under body product for treatment of cars, trucks and buses during production, at import plants and in the aftermarket. When applied to a clean, dry surface, it adheres to both painted surfaces and those coated with a layer of PVC or similar product. Zinc, rubber and plastics are completely unaffected by the product. A clean and economic treatment on the line is assured by the products easy applications and high solid content.

Under Body Coating is also designed to be used on spare parts, machines and iron and steel structures in highly corrosion inductive conditions. It is also very suitable as a transport and storage anticorrosive for long term transporting or warehousing under extremely corrosive circumstances.

Application:

Under Body Coating can be applied by spraying with manual or automatic airless application

Under Body Coating

Variants of Under Body Coating Available

1. Wax based under body coating
3. Bitumen based under body coating
4. Diesel resistant under body coating
5. Transparent under body coating
6. Acrylic under body coating

Engine Coating

This Product has the following properties -

- It leaves a hard , transparent film
- is heat resistant to both alkali and acids
- is heat resistant up to a temperature of more than 200 0C
- gives a shiny and clean film which facilitates a visual inspection of metal surfaces , reading of labels and numbers etc.
- has good adhesion and flexibility on rubber and plastic parts at both low and high temperature.
- has a very short drying time and is designed to be sprayed for on line protection

This product has been specially developed to be used on surfaces, which are exposed to both high and low temperatures.

Appropriate parts to be treated with this product are engine compartments, engines, and other details, which have to withstand high temperatures.

Application

The above products can be applied by spraying with manual or automatic airless application equipment. It is suitable for either air mix or airless spraying.

Advantages of Sound Deadening Pads

- 👍 First time in India
- 👍 Used for reducing the sheet metal vibration in a vehicle.
- 👍 Product - Butyl material.
- 👍 Approved and used at the manufacturing level by Global Auto Majors like Ford, GM, Chrysler world over.
- 👍 In India - Used at the manufacturing level.
- 👍 Big difference in terms of driving feel and comfort, which can be felt immediately.
- 👍 Product to be used once in the life of the vehicle - **Life Time Warranty**
- 👍 Effect is Life long i.e. until & unless pads are physically removed.
- 👍 Negligible increase in Weight & hence no effect on fuel consumption.
- 👍 Excellent feed back from customers to date
- 👍 Areas covered - four doors, rear quarter panels & dickey. In case of diesel vehicles, can be used in the bonnet.
- 👍 Objective is to offer the customer a system which bridges the N.V.H. gap.

Rat Repellent

Peel of label and insert cable tie

secure using cable tie to a cable or wire in bonnet

A specially formulated non-poisonous rat repellent, Rat Repellent drives away rats from your surroundings. With Rat Repellent, forget the days of removing dead rats after poisoning them. In other words, Rat Repellent does not kill rats as the rodenticides do. The hazards of killing rats, emotional or environmental concerns can thus be avoided.

Use it once (apply the Rat Repellent Cake for 20 days) and for long, you can say goodbye to rats and mouse and relax in peace.

Rat Repellent is suitable for industrial, commercial, residential areas, agricultural lands, lawns / gardens and is beneficial for use in cars, trains, and wherever there is rat disturbance.

Application: How To use?

Peel off label and secure bottle to inside of bonnet with cable tie provided, one near the right side head light (near battery) & the second one near the wiper motor bottle. Keep away from source of heat and moisture

Instructions and care

Ensure keeping the container in the same spot for 20 days continuously for better results

Rat Repellent gives best results when used in the area of infestation than keeping in its passage

Keep infested area as clean as possible

How does it work?

The application of Rat Repellent temporarily affects the mucous membrane of rats. The rats after a long exposure, gradually starts developing a fear to the smell and hence, moves away from the area where it is applied.

The fear is well communicated with the other rats. As a result, its application can keep away other rats also from the area for a long time.

Note that rats may visit the area for 7-10 days before the repellent begins and rats start running away from the surroundings.

Product Pack size

<i>Product</i>	<i>Pack size</i>
Cavity Wax	Aerosol Can – 400 ml / 1 ltr Can / 20 ltrs Drum
Under Body Coating	Aerosol Can - 500 ml / 1 kg can / 20 kg drum
Engine Coating	Aerosol Can – 400 ml / 1 ltr Can / 20 ltrs Drum
Rust Convertor	1 ltr bottle
Silencer Coating - Silver / Black	Aerosol can – 400 ml
Sound Deadening Pads - Silver	Box of 25 sheets – each sheet 500 mm x 250 mm
Sound Deadening Pads - Black	Box of 25 sheets – each sheet 500 mm x 250 mm
Interior Cleaning	1 ltr can / 5 ltr can / 35 ltr can
Car Shampoo	1 ltr / 5 ltrs / 35 ltrs
Rat Repellent	Box of 100 pieces
Air Bond	Loose – 1000 pieces pack
