

SELENIA K P.E. Cod. 1411

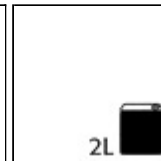

DESCRIPTION

Selenia K Pure Energy is the new fully synthetic lubricant for new petrol engines. With its low ash content it passes the new ACEA C3 specification and offers total protection of the catalyst, thereby lengthening its life cycle.

CHARACTERISTICS

The new petrol engines can combine fuel saving, low emissions, ease of handling and top performance thanks to the adoption of innovative technical solutions such as direct injection and the turbine with variable geometry. The new petrol power units can thus offer considerable advantages in terms of reducing pollution ensuring excellent handling features and noiselessness.

- | Selenia K Pure Energy is the lubricant especially formulated to maximise fuel economy, warrant compliance with anti-pollution regulations, protect engines created to operate at ever higher temperatures and enhance the typically sporty character in turbocharged versions.
- | Painsstaking study has led to the definition of Selenia K Pure Energy where particular additives warrant very high thermal stability that sets this product apart from all its predecessors. This feature, combined with very low cold viscosity and a low friction coefficient make Selenia K Pure Energy the best product with which to achieve top engine performance ensuring full enjoyment and protection of it.

ADVICE ON USE

As per OEM owner manual

RECOMMENDED BY

Fiat - Lancia

TECHNICAL DATA

SAE 5W-40, ACEA C3, API SN/CF,
